

AOI general syllabus fall 2020 for Mr. B. Mojo Krup

Welcome to AOI math. This is available all semester and will be offered next semester as well. Students will take three AOI classes at a time. All three will have to be completed, including in person final, by quarter's end as in the following quarter, students will be taking the other three classes thus making a full schedule of classes for the semester.

- 1) Students will use Edgenuity for all coursework
- 2) Students must spend a minimum of 4 hours and 30 minutes per school day to be considered present. Parents/Guardians and Students can check on their hours by clicking on their name on the top right of Edgenuity, then selecting the profile icon.
- 3) Students may not bank time from weekends or previous days to make up for deficient time on any school day, each school day's time stands on its own.
- 4) Teacher will enter grades into the gradebook each Wednesday and the only grade that will count is the last one entered. The grade is the "actual grade", taken from Edgenuity. There is no supplemental work or grades such as extra credit.
- 5) We will follow the school calendar available on the district website under the "families" tab.
- 6) All classes must be completed, including in-person final exam by Friday October 9th except AP courses.
- 7) If a student finishes the course early, he/she may take the final in the teacher's classroom upon making an appointment with the teacher
- 8) If a student finishes the course early and completes the final exam, he/she will be considered present for the remainder of the quarter's attendance
- 9) If a student finishes the course early and completes the final exam, he/she may not start another course or get a head start on next quarter.
- 10) Attendance is taken twice, once at the end of the school day, and again the next school day at the end of that day. Students will be marked absent if the 4.5 hours is not met by the time attendance is taken (typically between 2:00 and 3:00). However, the attendance will be corrected when the teacher takes attendance the following school day if the 4.5 hours has been met by midnight.
- 11) When a student is ready to test, he/she must take pictures of their handwritten notes and include them as an attachment to an email with the request for opening of the test. The teacher will approve tests during school hours but if after-hours are required due to special circumstances such as employment, student can make arrangements with the teacher for tests to be opened after-hours. Test must be taken with 90 minutes of the test being opened by the teacher so be sure to be ready to test when the request to open the test is made.
- 12) Students are afforded two attempts for each activity including quizzes and tests.

- 13) The teacher has 8-9 different classes per period and six periods, so each child in each class will need to look to their personal Edgenuity course to see what topics are covered and what is the scope and sequence of their particular course
- 14) Please include the math course, student's full name, and class period when inquiring about a student in an email

If you have any questions or need clarification on anything, please contact me at bkrup@cguhsd.org

A few common questions and their answers:

How grade is determined:

The "actual grade" from Edgenuity is the grade we use. weights are as follows: quiz 20%, tests 32%, assignments 28%, and final exam will be 20%. AP classes and Honors classes may differ.

When we take attendance and how long must they work to be present:

We are required to take attendance at the end of the school day. If the student has not reached 4.5 hours by then, we mark the child absent. We take attendance the next school day and check to see if the student achieved 4.5 hours after school the previous school day and if they did, we change the previous day's attendance mark to present. You can check your time by clicking on your name on the top right of Edgenuity and then clicking on "profile".

Evening/weekend attempt at test taking:

I am online approving tests and answering emails during school hours. I typically am not online overnight or weekends. If you are unable to contact me during the typical school day and require only alternate hours for your test approvals, please let me know and tell me what hours. Tests time out in 90 minutes so it is important that students ask for tests to be approved when they are ready to start and I cannot schedule a test opening for later or after hours so the student will have to make arrangements with the teacher if he/she requires after hours testing approval.

How can I get math help:

As far as I know, there is no online tutoring, but I do have office hours daily from 1-3 each school day except Wednesdays. Kids have been using that as a tutoring session. Hardly anybody come to that so you can get pretty much one on one assistance from me at that time. During the school day I can also help with individual math problems, just screenshot them and email as an attachment.

Please include pictures of handwritten notes:

I typically approve tests during the school day very quickly, though I do take lunch from 11:10-12:10, but I need to see a picture of your handwritten notes from the unit you are testing on, prior to approving the tests. Your school computer has a camera in it that you may use, unless you prefer to use your own, such as on a phone. Alternatively, you can come to MS Teams office hours, 1-3 each school day except Wednesdays, and show them to me on video. Please include pictures of notes on each request for test approval, even if you sent it one day but did not get to take the test and it timed out, or you are taking a second attempt. This will speed the approval process.
