As you consider your scheduling choices for the entire school year, there are a few things you must keep in mind. First, select courses that make the most sense for preparing you for your education and/or career after school. College-bound students need to be taking Pre-AP and AP courses, advanced math, advanced science, and depending on the school you plan to attend, you will need 2-3 years of a world language and a year of a fine art. Taking these courses better prepare you for taking the ACT and SAT tests and the academic rigor of college. Second, once you decide on what you want to take next year, **you will NOT be allowed to change your schedule**. The reason is because we decide our staffing for the school year based on this schedule. When students decide to change their schedules for first and/or second semester, it can dramatically affect the class sizes. When there is more unanticipated demand in some courses, overloading can occur and because there are limits to how many students can be enrolled in a class, some students may not get to take that class. Too much movement out of certain classes can create low enrollments to the point where a class may not be offered. This is when it can affect how many teachers we would need. We want to avoid both problems. You will have ample time to consider what you want to take next year so please choose wisely.
